2.)

13 Head Pillow Figure A: A head pillow yet not as big as a regular pillow with a wedge like insert that would span the vertical length of the pillow, surrounded by foam and conventional pillow stuffing covered by conventional pillow cover material extending out to meet the torso wedge pillow (circular cylindrical shaped) with varying lengths as per comfort of consumer - some as long as the entire upper torso - some long enough to wedge the shoulder only. The two pillows could connect by a male to female velcro pieces under covering of both pillows when joined. When or if pillows are not joined the male velcro extended piece can fold onto itself.

37 CFR 1.84

With the customer in the prone position greater comfort and rest occurs when using these pillows together by reducing the overall rotation and possible stress to the neck, and years of sleeping each night in a position that has been proven to be stressful to the neck. This pillow is designed to eliminate excess rotation and stress when sleeping in the prone position, for those who can not sleep in supine or side lying position.
